

3M Window Films.

Another great 3M product you can trust in your home.

Other advantages of 3M™ Window Films.

Reduced glare.

Few things are as frustrating as working on a computer screen or trying to watch television in a sunlit room. By significantly reducing glare, our films help you do your work or relax without the added eyestrain from excessive light.

Protects your furnishings as well.

3M Window Films are designed to reduce the effects of solar heat and visible light on your furnishings and will block up to 99% of the sun's harmful ultraviolet rays, which are the single largest cause of fading. While no film can stop fading completely, our films dramatically slow the progress of fading to keep your home looking beautiful.

Our exclusive warranty.

Selecting 3M Window Films gives you peace of mind. That's because we have one of the most comprehensive warranties you can get. 3M Window Films are backed by a limited-lifetime residential warranty should your window film need replacing.

Put the innovation of 3M to work for you.

Put your trust in 3M Safety and Security Window Films, a name you know for quality products and service. We never stop creating new window film products and solutions that protect you and your family.

3M Window Films

Helping keep outside dangers outside.

3M™ Safety and Security Window Films for homes.

We invented window films.

No one has more experience with window films. In 1966, we received the first patent for window films, and we continue to invent new ways make your life brighter. Today there are millions of square feet of 3M Window Films installed all around the world.

For decades, 3M has been the world leader in the development of innovative adhesives and films. 3M films resist peeling, bubbling, scratching and abrasion for long-lasting beauty and clarity. And we have one of the most comprehensive warranties you can get. 3M Window Films are backed by a limited-lifetime residential warranty should your window film need replacing.

The Skin Cancer Foundation recommends many 3M Window Film products as effective UV protectants.

When weather or criminals try and do their worst, protect your family with 3M™ Safety and Security Window Films.

For as beautiful as glass windows make your home, they can also pose a serious danger during severe weather or other violent threats. 3M Safety and Security Window Films can help you keep those dangers outside.

During a disaster, 3M Safety and Security Window Films help hold the glass together to maintain the integrity of your home. This also helps to keep flying glass from harming inhabitants and, in many circumstances, to keep out wind and rain.

3M Safety and Security Window Films also help you deter crime. Because the window film improves the integrity of the window, the criminal is slowed down to such a degree that they may choose to move on to an easier target.

Our thin film gives you
a wider margin of safety.

It would make sense that a thicker film would be stronger than a thinner film. But that's not the case with 3M Window Films. Our patented films use layer after layer of micro-thin polyester to outperform all other films of similar thickness.

This superior performance is due to the remarkable flexibility of our film. So while other films tear, ours merely stretches. And no film has been tested like ours. Our films have been subjected to windstorms, bomb blasts, all kinds of flying objects and a rigorous series of durability tests. We have gone to extreme measures to make sure our films meet or exceed industry standards for impact and tear resistance.

Trust 3M.

When it comes to protecting your family, you want to deal with a company you can trust. No one has more experience with window film. In 1966, we received the first patent for window film. Today there are millions of square feet of 3M Window Films installed all around the world.
